## WORKS 11: THE NAME AND ORIGINS

The name and the origins of the WORKS 11 Company are connected with the 1990s insolvency of the Z.M. Łuczniczka S.A. in Radom – manufacturer of the best quality AK-family weapons within the ex-Warsaw Pact, which fell into bankruptcy after the end of communism in Poland. The then nascent Company bought several boxcar loads of Z.M. Łuczniczka S.A. memorabilia and remnants, including Technical Data Packages of the products, as well as the right to the “11 in oval” codename logo, which gave the Radom-manufactured weapons the “Works 11” moniker used by the Western Tech-Intel community.
